REPORT SUMMARY

Artificial Intelligence Capabilities for Intelligence Collection and Analysis, Project 2023-1008

The objective of this audit was to determine the extent to which the Defense Intelligence Agency's (DIA's) strategic efforts to timely develop, acquire, adopt, and maintain secure and reliable artificial intelligence (AI) capabilities improved intelligence collection and analysis in accordance with applicable policies, standards, and requirements. Additionally, we assessed whether there were any administrative or technical barriers to DIA's accelerated adoption of AI capabilities. We issued the results of our evaluation, along with ten recommendations, in a final report dated December 20, 2024.
